

Amendment to the Specification

At page 17, starting at line 18, please amend the following two paragraphs as follows:

Forty % by weight of the toner obtained with the formulation of the dry polymerized system and 60% by weight of ~~an electrolytic solution~~ a carrier liquid (ISOPAR H[®], Exxon) were mixed, and kneaded by a sand mill to prepare a toner.

<Toner preparation method 5>

Forty % by weight of a mixture consisting of 1 part by weight of carbon black (MA-7, Mitsubishi Chemical Corp.) as a colorant, 0.5 part by weight of a charge control agent (REFLEX BLUE[®] R51, Hoechst AG), and 98.5 parts by weight of a binder resin was mixed with 60% by weight of ~~an electrolytic solution~~ a carrier liquid (ISOPAR H[®], Exxon). The mixture was kneaded with a sand mill to prepare a toner.

Please amend tables 1 (see pages 18 and 19 of the specification) and 3 (see pages 23 and 24 of the specification) as follows:

RECEIVED
CCT 20 2003
